Education | International Programs

- Universidad Politécnica de Valencia** 2024 – 2028
BSc in Data Science Avg Grade: 9.1 / 10 | 8 Honors
 - **Awarded Best Academic Record of the Promotion** (Ranked 1st/100+ in cohort for highest GPA in 1st year).
 - **Honors in:** Linear Algebra, Mathematical Analysis, Exploratory Data Analysis, Programming, Data Structures, Databases, Data Acquisition & Transmission, and Discrete Modelling.
- Beihang University** Jul 2026
International Summer School – Embodied AI and Intelligent Systems Beijing, China
 - Completed intensive coursework in Embodied AI, focusing on spatial intelligence, robotic perception, and multi-agent collaboration.

Projects

- ETH Zurich Datathon | RobinReal Challenge** Apr 2026
AI-powered semantic search engine for real estate Zurich, Switzerland
 - Tools & technologies used: Python, NLP, LLMs, Docker, Vector Databases, Sentence Embeddings.
 - Developed an intelligent search portal that allows users to find and rank properties using natural language queries instead of traditional filters.
 - Implemented a ranking algorithm to sort properties based on complex user preferences and qualitative descriptions.
- Sigma Data Club x UPV Investment Club** 2026 – Present
Automated dashboard for investment portfolio management Collaboration
 - Tools & technologies used: SQL, Data Ingestion, Database Design, Python, GenAI, PostgreSQL.
 - Collaborating with students to design and implement a data architecture for the club’s automated portfolio management system.
 - Responsible for data ingestion processes to ensure efficient data preparation and loading.
- UFC Fight Prediction & Betting Recommender** Aug - Nov 2025
End-to-End Machine Learning project and pipeline automation Python | ML
 - Tools & technologies used: XGBoost, Web Scraping (BS4), Statistics, Python.
 - Developed a full pipeline from scraping historical data to a terminal-based interface that provides betting recommendations based on odds, achieving a 60% ROI in 2024.
 - Launched a public Kaggle competition to foster collaborative learning in sports analytics.

Experience & Leadership

- Data Engineer & Project Manager, Sigma Data Club** 2024 – Present
 - **Data Architecture & Leadership:** Leading the data engineering team in designing and maintaining scalable data pipelines and PostgreSQL databases for financial analytics and portfolio tracking.
 - **Project Management:** Overseeing end-to-end technical project lifecycles, coordinating student developer teams, and driving strategic collaborations with investment groups and industry partners.
 - **Automated Data Ingestion:** Leading ETL pipeline development to automate multi-source data ingestion, ensuring high data quality, strict schema validation, and reliable analytics loading.

Technical Skills and Interests

Languages: Spanish (Native), English (Cambridge C1).
Programming & Systems: Python (Advanced), SQL, R, Git, Docker, PostgreSQL, Supabase.
Data & Quant Engineering: Data pipelines, Websocket streaming, Event-Driven Architecture, Feature Engineering.
Honors / Awards: Academic Excellence Award.
